

GUNK® High Mileage Motor Flush Cleans and Quiets Older Engines in 5 Minutes!

Formulated for Engines over 75,000 Miles

For 50 years, GUNK® Motor Flush™ is the choice of professionals and do-it-yourselfers. This reliable and gentle additive loosens and floats away the accumulated sludge and deposits from inside oil passageways, piston rings, hydraulic lifters, and more. GUNK chemists confirm that their formula is suited for high-mileage engines over 75,000 miles.

Engine sludge can accumulate in engines that have suffered from longer-than-recommended oil change intervals, lots of stop-and-go driving, and an accumulation of high-mileage. Sludge build-up can be aggravated by today's high-temperature, higher-output, smaller engines.

GUNK High-Mileage Motor Flush Features & Benefits:

- ▶ Removes gums, varnishes, and sludge from internal parts.
- ▶ Releases sticky valves and piston rings, allowing oil to circulate freely to all parts of the motor.
- ▶ Treats engine in 5 minutes. Use as directed.
- ▶ Not recommended for turbo-charged engines lubricated by the engine oil

Packaging Information:

MF3 32 fl. oz. 946 ml. 12/Case
